

Dr. Arthur (Art) Becker holds several simultaneous positions within the Intelligence Community. He is Chief of the Multi-Int. Research Organization on the staff of the Directorate of Research at NSA. He is also detailed to the Intelligence Advanced Research Projects Activity (a Director of National Intelligence Organization) through the Office of the Chief Scientist at CIA. In this capacity, Dr. Becker is the Program Manager for the Knowledge Discovery and Dissemination (KDD) Program. This research program is focused on collaborative analysis, information fusion, and information sharing across the Intelligence Community. Dr. Becker established and is the Director of the Geneva Center at the Johns Hopkins Applied Physics Laboratory. Geneva is a multi-agency center that performs operational evaluations of information and analysis technology for Intelligence, Defense, Homeland Security, and Law Enforcement Communities.
