PEER-REVIEWED JOURNAL ARTICLES

Following the citation information for each article, I have provided the SCImago rating in brackets, when available. SCImago Journal and Country Rank (SJR) provides metrics that consider both the number of citations issued by a journal as well as the influence of the individuals who cite from the journal, presenting an “average prestige per paper” figure. Scores among journals in a discipline are divided into quartile rankings (Q1-Q4). Q1 denotes a journal in the top 25% of the distribution of all journals for a given subject category (i.e., communication).
